# "olome Inventory"

ol.

The "olome Inventory" module digitizes **your stock management**. It provides a**simplified management**, with a customizable tree structure of stocks and sub-stocks. It can be consulted by anyone, and you can easily declare all your incoming and outgoing products, consumables and materials. A **alert system** informs you of **critical stock** levels , and you can link your inventory directly to current orders and projects.

Benefits of the "olome Inventory" module:

- **Improved visibility**: You get a clear view of inventory allocation by project or site, including quantity and location.
- **Automated valuation**: The module automatically calculates inventory valuation, helping you to make financial decisions.
- **Precise location**: Management includes exact location within your stocks and sub-stocks, making it easy to locate and retrieve items.
- **Detailed inventory**: The module provides an inventory with a complete history of all movements, ensuring seamless traceability.
